

# Butler vs **Advisor**

AI helps two ways - Butler executes a task, Advisor thinks with you.

# ⚡ Human Spark

## THE MODEL

Graduate up as your fluency grows ↑

<b>Advisor</b>	Thinks with you - "what am I missing? argue against my plan." Higher verification tax - <b>graduate to it.</b>
<b>Butler</b>	Executes; you verify - summarise this, draft this email, extract these fields. Low verification tax. <a href="#">START HERE</a>

Early, to set where AI value comes from and sequence what to try first.
