

# The Sycophancy Trap

AI agrees by default - so ask it  
to attack the plan, not bless it.

# ⚡ Human Spark

## THE MODEL

### **By default**

IT AGREES

Says yes, and explains why enthusiastically - even when the plan is weak.

### **Ask instead**

MAKE IT ATTACK

What are the three weakest points? Where am I most likely to fail? What am I not seeing?

Whenever someone uses AI for judgement or strategy work.
